

# Compliance is a pit stop – your destination lies ahead.

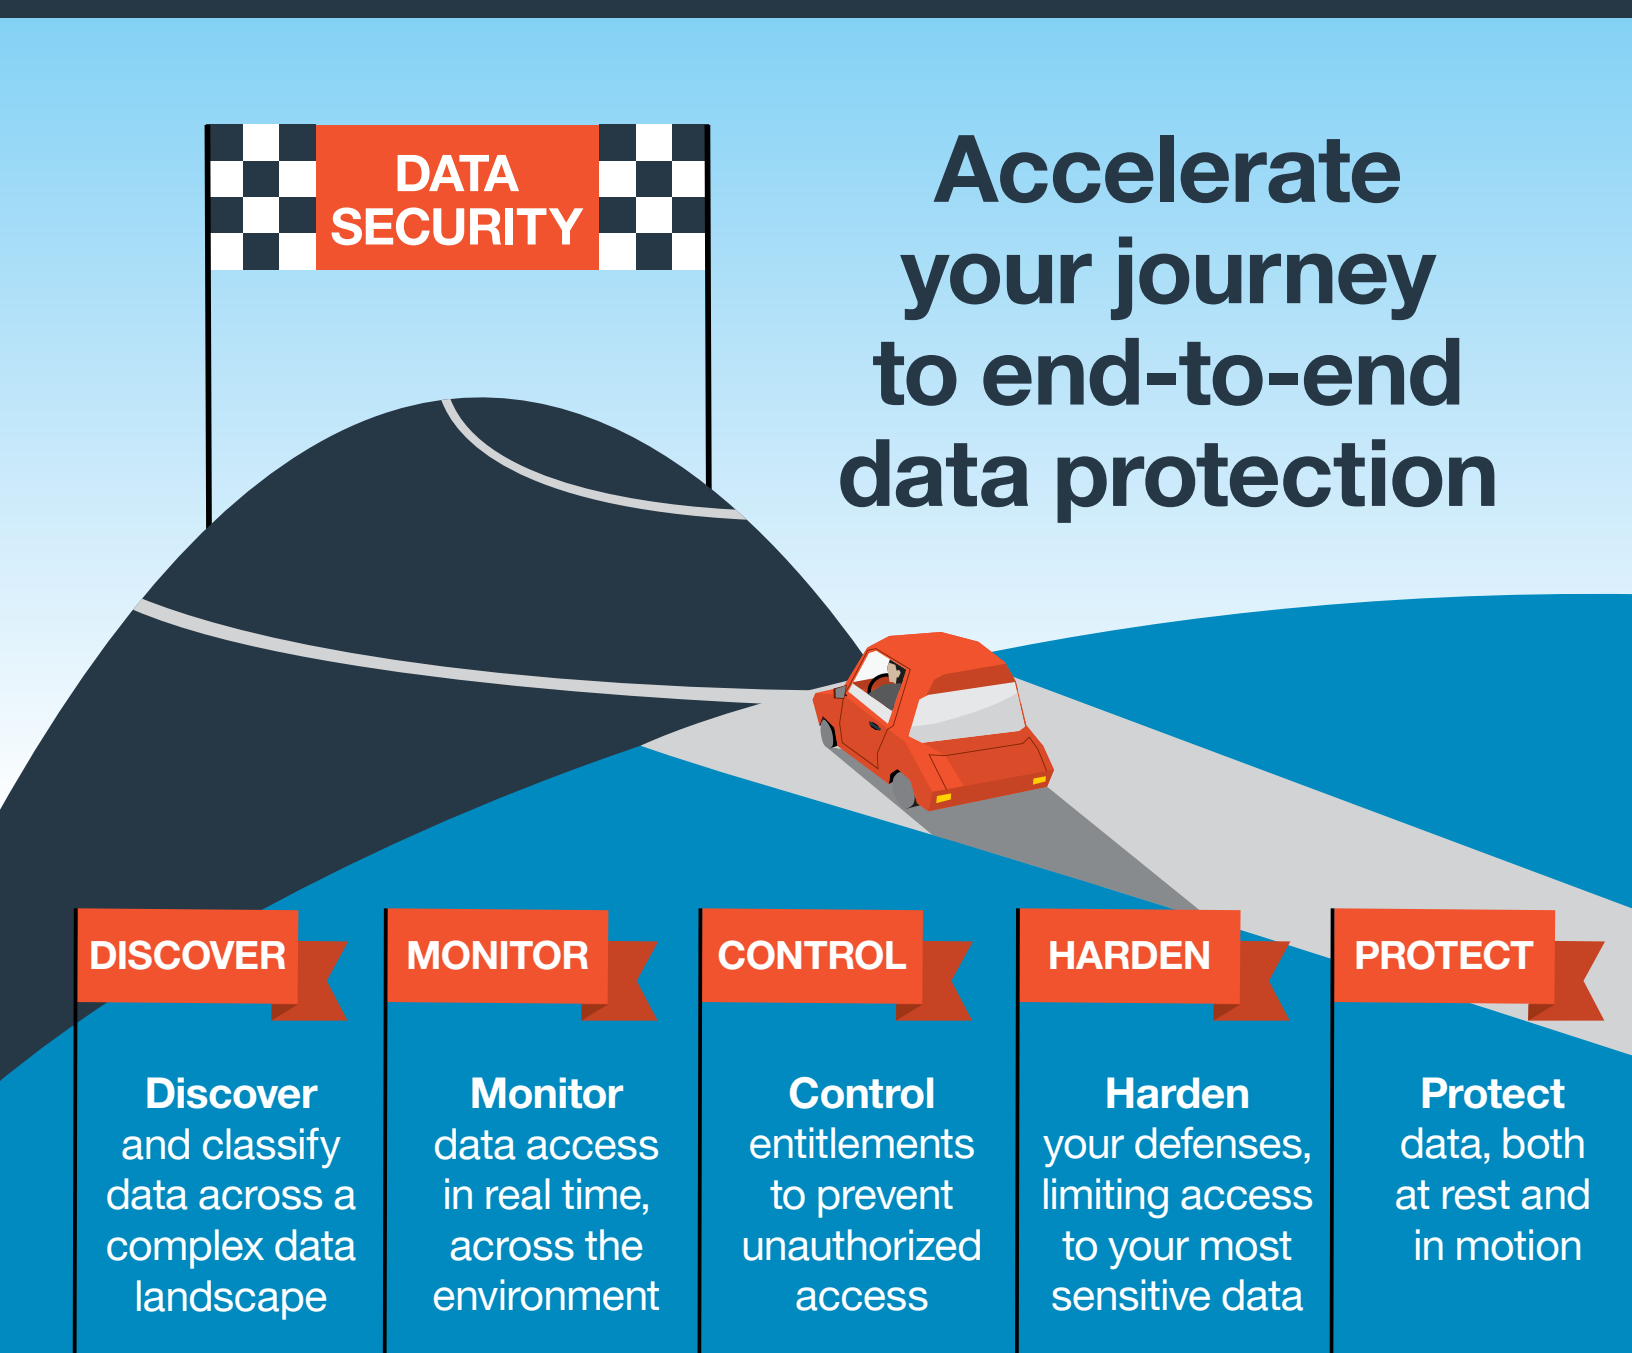

Achieving compliance is the start in your data security journey – don't let it stop you before you get started.

## Protect your business: Take the journey beyond compliance

Regulatory compliance alone can lead to big security potholes:

-  Theft of trade secrets and product designs
-  Exposed sensitive data in cloud and big-data environments
-  Loss of sensitive customer, business partner, or supplier data
-  Undetected insider threats

Learn how **IBM® Security Guardium®** can help you move past bare compliance to deep data security. Visit [ibm.com/guardium](http://ibm.com/guardium) to learn more.
